

SmartReview — Preparer & Reviewer Journey Map

Prototype: SmartReview-ProtoC2 (multi-pass handoff)

Return: Jessica Drake · 1040

Roles: Sara Chen (preparer) · Jordan Lee (reviewer)

Overview

SmartReview splits tax return review into **data accuracy first, insights second**. Sara (preparer) completes **Pass 1** in two sequential phases—import accuracy, then AI diagnostics—before handing the return to Jordan (reviewer). Jordan opens a **Pass 1 briefing** (activity log), then begins **Pass 2** with a phased reviewer checklist, output attestation, and sign-off. The **Smart review brief** is the shared handoff surface across both roles.

Moments table

Phase	Actor	What they do	UI surface	Outcome
Welcome	Preparer	Reads two-step overview; starts import review	Welcome pane (Intuit Assist)	phase = import; review begins
Import accuracy	Preparer	Verifies source PDFs against OCR fields; edits or marks correct	Source docs panel + detail fields (W-2, 1099s); Phase 1 banner; 1040 minimized	Import flags cleared; docs marked verified
Import complete	Preparer	Confirms all flags + docs done	Phase 1 completion message	Phase 2 unlocks (Continue to AI Diagnostics)
AI diagnostics	Preparer	Reviews compliance, YoY, opportunities; marks reviewed	Agent report pane (AI Review); 1040 expanded	First-pass diagnostics cleared
Output attestation (Pass 1)	Preparer	Checks summary lines on 1040 / schedules	Output forms + Prep attest column	Preparer checks stamped (who/when)
Pass 1 brief	Preparer	Reviews own activity before handoff	Smart review brief → preparer summary tab	Activity log ready for reviewer
Handoff 1	Preparer	Sends return to reviewer	Brief → Pass to reviewer → Send to reviewer	awaiting-reviewer state; snapshot frozen

Pass 1 briefing	Reviewer	Reads Sara's Pass 1 work	Smart review brief → activity log (reviewer-briefing)	Context before independent review
Handoff 2	Reviewer	Starts independent Pass 2	Begin Pass 2 review	reviewPass = 2; strategic checklist opens
Reviewer checklist	Reviewer	Works phased checklist (4 phases); attests manual items	Brief → Reviewer checklist tab + executive brief	Open items → attested items
Output attestation (Pass 2)	Reviewer	Confirms preparer lines; re-confirms after edits	Output forms + Rev attest column	Dual Prep/Rev trail on summary rows
Notes & flags	Reviewer	Resolves preparer notes / flagged items	Notes pane; open-items filter chips	Outstanding count → 0
Handoff 3	Reviewer	Signs off return	Approve & sign off return	Return marked reviewed; ready to file

Handoffs

1. Preparer → Reviewer (Send to reviewer)

- **Trigger:** Sara completes Pass 1 (import + diagnostics) and chooses **Pass to reviewer** → **Send to reviewer**.
- **Transfers:** Handoff snapshot (open vs. done groupings), full activity log (documents verified, flags cleared, edits, summary checks, diagnostics reviewed), preparer attestations on output forms, notes, live return amounts, phase completion state.

2. Pass 1 briefing → Pass 2 (Begin Pass 2 review)

- **Trigger:** Jordan reads activity log and clicks **Begin Pass 2 review** (or demo **Open as reviewer**).
- **Transfers:** Same persisted session state; UI switches to **reviewPass = 2**, **reviewRole = reviewer**, **phase = diagnostics**; brief opens on **Reviewer checklist** tab with Pass 1 executive brief and four strategic phases.

3. Pass 2 complete → Sign-off (Approve & sign off)

- **Trigger:** All required checklist items attested, outstanding open items = 0, reviewer Rev confirmations current.
- **Transfers:** Sign-off readiness gate releases; reviewer attestation state and manual checklist completions are the record of Pass 2 approval.

Review aspects checklist

Aspect	Pass / phase	Primary actor	How it's satisfied
--------	--------------	---------------	--------------------

Import accuracy	Pass 1 · Phase 1 (import)	Preparer	Clear all OCR/import flags; verify each packet document
Doc verification	Pass 1 · Phase 1	Preparer	Mark docs verified against source PDFs (W-2, 1099-INT/DIV/R, etc.)
Diagnostics	Pass 1 · Phase 2 (diagnostics)	Preparer	Mark each AI diagnostic card reviewed in Agent report pane
Output attestation	Pass 1 & 2	Preparer then Reviewer	Prep ✓ on summary/1040 rows; Rev ✓ confirms for sign-off
Reviewer checklist	Pass 2	Reviewer	Four brief phases + manual attestation items in Smart review brief
Sign-off	Pass 2 complete	Reviewer	Approve & sign off return when checklist + open items clear

Activity log categories (Pass 1 audit trail)

Category	What it records
Documents verified	Each source doc marked verified against PDF
Import flags cleared	OCR/import flags resolved (edit or mark correct)
Amount edits (no flag)	Field edits not tied to a cleared import flag
Return summary reviewed	Preparer attestation on 1040 summary lines
First-pass diagnostics cleared	AI diagnostic cards marked reviewed in Phase 2

Strategic checklist phases (Pass 2)

1. **Phase 1:** Source documents & income verification
2. **Phase 2:** Tax law strategy, safe harbors & form diagnostics
3. **Phase 3:** Deductions, carryforwards & estimates
4. **Phase 4:** Executive 1040 totals & YoY variance walkthrough

Key UI surfaces (quick reference)

Surface	When used
Source documents panel	Phase 1 — side-by-side doc + fields
AI Review panel	Phase 2 — diagnostic cards
Summary / output forms	1040, schedules; Prep/Rev attest columns
Summary button → Smart review brief	Pass 1 wrap-up, Pass 1 briefing, Pass 2 checklist
Phase banners	Progress for import flags and diagnostics
Notes pane	Preparer notes; reviewer resolution in Pass 2

Export to PDF

Recommended: Open `docs/review-journey-map.html` in a browser → **Print** → **Save as PDF**.

Alternatively, from the project root:

```
npx --yes md-to-pdf docs/review-journey-map.md
```

If a `review-journey-map.pdf` exists alongside this file, it was generated automatically during doc build.
